Third-Party Verification of GHG Emissions Based on ISO14064

NS United Kaiun Kaisha, Ltd., hereby announce that we have obtained a third-party verification from the Nippon Kaiji Kyokai (ClassNK) for our calculated greenhouse gas (GHG) emissions, including Scope 3 emissions from our group, and have received a verification statement.

Based on ISO14064-1 (*1), we calculated Scope 1 and Scope 2, which are direct and indirect GHG emissions from our corporate group, including operating vessels, business sites and subsidiaries, and Scope 3, which are emissions from the entire value chain of our group during the period from 1st January, 2019 to 31st December, 2020.

The calculation results were independently verified by ClassNK in accordance with ISO 14064 -3 (*2), and we have obtained the verification statement to the effect that they comply with the international standards.

Our company has set the objective to "Reduce CO₂ emissions per ton/mile unit by 20% from 2019 levels by 2030" as one of the ESG initiatives in the Medium-Term Management Plan "FORWARD 2030 ~ Driving U forward over the next decade ~".

By accurately calculating, assessing and verifying emissions in accordance with the international standards, we will seek further improvement based on highly reliable data and continue to work to reduce GHG emissions to achieve our targets.

(*1) ISO14064-1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals

(*2) ISO14064-3: Specification with guidance for the validation and verification of greenhouse gas assertions
