Elementary School Children Visited “KIMIMACHI”

On February 28 and March 3, a total of 40 children from two elementary schools in Soma County, Fukushima Prefecture, visited our operated bulk carrier (the ship) “KIMIMACHI” berthed at the Port of Soma. This event was held as part of the 30th celebration of the commencement of commercial operation at Shinchi Power Station of Soma Kyodo Power Company, Ltd. and we also collaborated with the aim of helping pupils deepen their understanding of the maritime industry and ships, as they will lead the next generation.

On the day of the tour, the children had the opportunity to tour the ship, including the bridge, and observe the cargo handling operations. Our staff explained the work on board and life aboard the ship, and the children listened attentively with great interest.

We will continue to actively engage in such activities to provide opportunities to spread the appeal of the maritime industry to the next generation.

Safety briefing from our representative

Touching the wheel on the ship's bridge

Cargo handling observation from the ship's bridge
